CIP History

Developer Assisted Projects

2007-2011 Adopted Capital Improvement Program

Overview

Introduction

The Developer Assisted Projects Capital Program includes the Underground Utility Fund and the Residential Construction Tax Contribution Fund (RCTCF). These funds are set up primarily to receive money from and/or provide payments to developers and utility companies. The 2007-2011 Adopted Capital Improvement Program (CIP) provides funding of \$14.2 million, of which \$6.7 million is allocated in 2006-2007.

This program is part of the Community and Economic Development City Service Area (CSA) and supports the following outcome: *Safe, Healthy, Attractive and Vital Community.*

Program Priorities and Objectives

This capital program is used to reimburse residential developers for the construction of street improvements throughout the City and encourage the undergrounding of existing overhead facilities.

The Underground Utility Fund is used to collect developer fees when a developer opts out of placing facilities underground at the time of development. The fund is then used to establish Rule 20B Underground Utility Districts. These districts combine several smaller undergrounding projects into one large project so as to minimize the undesirable result of piecemeal undergrounding of utility facilities throughout the City. The districts pay for the design, construction, and administration of these projects. Projects are prioritized with a five-year plan based on several criteria, the most important of which is the total amount of fees collected within the proposed Underground Utility District. Other criteria include whether or not the

undergrounding work can be coordinated with other capital improvement work such as street widening, and established equity in the amount of undergrounding proposed among Council Districts.

The Underground Utility Fund is also responsible for the administration of the Rule 20A Program. Through Rule 20A, the California Public Utilities Commission requires Pacific Gas and Electric (PG&E) to annually set aside funds to finance the undergrounding of overhead facilities located on public streets within the City of San José. AT&T (SBC) and Comcast budget funds to participate in projects in which PG&E Rule 20A funds are programmed. City staff legislates the underground utility districts, reviews plans and designs, and coordinates and inspects undergrounding projects. There is currently a backlog of Rule 20A projects due to utility company funding and resource issues. Last year staff held several workshops with PG&E and developed guidelines to implement the program in a more timely fashion.

Developers who construct residential dwelling units pay contributions to the RCTCF. Payments from the fund are made to developers who construct eligible improvements on major City streets in connection with new residential developments. This program implements the City's General Plan Goals and Policies, which state that the City should assign priority to the installation and maintenance of landscaping in median islands and back-up strips along major thoroughfares. Reimbursements to developers for qualifying improvements are made on a first-come, first-served basis according to when the improvements are accepted by the City and when the developers

Developer Assisted Projects

2007-2011 Adopted Capital Improvement Program

Overview

Program Priorities and Objectives (Cont'd.)

subsequently invoice the City with appropriate documentation of their costs. The major program priority and objective is to ensure that residential developments within San José include the construction of public improvements necessary to maintain or improve the infrastructure of the City.

On April 23, 1992, the City Council approved an amendment to the RCTCF Ordinance in an effort to achieve a balance between annual revenues and expenditures and reduce a large fund balance. The amendment modified the ordinance to allow for the use of funds for several additional purposes, including the construction of city-wide median island landscape projects along residential frontage streets, provided funds are available in the RCTCF.

Sources of Funding

Revenue for the CIP is derived from two sources: the Underground Utility In-Lieu Fee (\$7.9 million), which is paid by developers, and the Residential Construction Tax (estimated at \$1.2 million over the next five years). Undergrounding revenues are higher in this five-year CIP than the projection included in the 2006-2010 Adopted CIP. The estimate for Underground Utility In-Lieu Fee collections is \$1.4 million in 2006-2007 and will continue to increase slightly in each of the remaining years of the CIP. Due to increased activity levels, the revenue projections for the Residential Construction Tax are also higher than the \$985,000 projection included in the 2006-2010 Adopted CIP. The annual Residential Construction Tax revenues are projected at \$250,000 for 2005-2006 through

2007-2008. Revenues are expected to level off at \$238,000 for the remaining years (2008-2009 through 2010-2011).

In both the Underground Utility Fund and Residential Construction Tax Contribution Fund, a significant portion of the respective fund balances will be used along with the projected tax and fee revenues to support undergrounding projects and reimbursements to developers for their street improvement projects.

Program Highlights

Within the Underground Utility Fund, current priorities for legislation include the Park/Naglee and Market/Almaden Underground Utility Districts. Both of these districts were successfully legislated in March and June 2006 respectively and are currently in design. The 4th/5th/6th Phase II Rule 20A Utility Underground District was completed in November 2005. The following Underground Utility District projects are currently in design: Guadalupe Gardens (bounded by Coleman Ave., Rte. 880 and Guadalupe River), Stevens Creek Boulevard (Stearns to Calvert), Jackson/Taylor (4th St. to 9th St.), Camden Avenue (Bascom to Leigh), Saratoga Avenue (Route 280 to Kiely), and Evergreen Park (Yerba Buena to San Felipe Road).

Some major anticipated activities within the RCTCF include reimbursements to KB Homes South Bay and Summerhill Homes for median island construction and center strip paving related to the Communications Hill and Dairy Hill projects. The reimbursements to these developers, originally anticipated to be paid in 2005-2006, are now programmed in 2006-2007 due to delays in project

Developer Assisted Projects

2007-2011 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

completion. The schedule for these types of projects are ultimately driven by the developer.

Specifically, \$512,000 is programmed for median island reimbursements and \$230,000 for center strip paving reimbursements. In 2006-2007 and beyond, some smaller street improvement reimbursements in the RCTCF have been programmed.

Major Changes from the 2006-2010 Adopted CIP

- As discussed above, the revenue estimates for the Underground Utility (In-Lieu Fee) Fund and Residential Construction Tax are higher than in the prior CIP.
- Due to rising operating costs and more comprehensive management/reporting requirements, annual funding for the administration of both funds has been increased.

Operating Budget Impact

There are no additional operating and maintenance costs associated with the projects in the 2007-2011 Adopted CIP, given that the median island construction and center strip paving related to the Communications Hill and Dairy Hill projects will be maintained through an assessment district involving newly developed properties. Within the Underground Utility Program, utility companies will maintain their own facilities.

Council-Approved Revisions to the Proposed Capital Improvement Program

During the June budget hearings, the City Council approved the rebudgeting of unexpended funds totaling \$2,000 in the Developer Assisted Projects Capital Program for the CIP Database Enhancement Project.

Developer Assisted Projects Capital Program

2007-2011 Adopted Capital Improvement Program

Detail of Capital Projects

1. Underground Utility Program

CSA:	Community and Economic Development	Initial Start Date:	Ongoing
CSA Outcome:	Safe, Healthy, Attractive and Vital Community	Revised Start Date:	
Department:	Public Works	Initial Completion Date:	Ongoing
Council District:	City-wide	Revised Completion Date:	
Location:	City-wide		

Description: Rule 20B Underground Utility Districts are established with fees paid to the City when a developer opts out of placing facilities underground at the time of development. Projects are prioritized with a five-year plan based on several criteria, the largest of which is the total amount of fees collected with the Underground District. This allocation is used for the design, construction, and administration of these projects.

Justification: Underground Utility Ordinance No. 23187 mandates that fees collected pursuant to the ordinance be used to fund the conversion of overhead utility facilities to underground facilities. The purpose of the conversion is to implement the urban design policies of San José's General Plan.

CSA:	Community and Economic Development	Initial Start Date:	Ongoing
CSA Outcome:	Safe, Healthy, Attractive and Vital Community	Revised Start Date:	
Department:	Public Works	Initial Completion Date:	Ongoing
Council District:	City-wide	Revised Completion Date:	
Location:	N/A		

Description: PG&E and other utility companies allocate their own funds to replace existing overhead electrical facilities with underground electrical facilities within the communities they serve. This allocation provides funding for the day-to-day administration of the undergrounding program, including design and plan review, coordination, inspection of undergrounding projects, underground service alert locating, and legislation of the Underground Utility Districts.

Justification: Underground Utility Projects occur per the City Council endorsed five-year workplan. The purpose of the conversion is to implement the urban design policies of San José's General Plan.
